

iPhone tips and tricks

Don Bartel

Switch Between apps

- Must be on home screen
- Double click home button
- Swipe left or right to locate the app you want to open
- Tap that app to open it

- Note: To close an app swipe up on that app
- Note: At least once a week double click and close all open apps

Mail

- Swipe left to uncover a "Mark as Read" button
- Swipe right allows you to flag message or send it to trash
- Drag down and reveal search box

What is eating your battery

- Go to **Settings>General>usage>Battery usage**
- Shows which apps used the most battery over the last 24 hours or 7 days.

Find your phone even if battery is dead

- To turn this feature on go to **Settings>iCloud>Find My iPhone**
- Then toggle "Send Last Location" on.

Talk instead of type

- Many apps have this feature.
- Can be used in email
- Can be used in Message

Quick Type

- This bar appears in many apps
- It suggests words as you type
- If it is the correct word just tap it and go on.

Enlarge an area of a photo

- Magnifying glass on a photo
- Go to Settings>General>Accessibility>Zoom
- Double tap 3 finger on photo to make magnifying glass
- Double tap 3 fingers to go back to normal

Adjust Exposure on photo

- Tap on where you want to set automatic exposure and focus.
- Slide you finger up and down to manually adjust the exposure.

Siri

- Tell me a joke
- Where am I?
- What is the weather?
- Send an email
- Set a calendar event
- Tell Siri who's who in your family

AirDrop

- With AirDrop, you can share photos, videos, websites, locations, and more with people nearby with an Apple device.
- Requires newer Apple products

AirPlay

- AirPlay lets you wirelessly stream what's on your iOS devices and Mac to your HDTV and speakers. Or mirror exactly what's on your display to the big screen. Guest can even easily share their content with peer-to-peer AirPlay
- Requires Apply TV to put on your TV
