

Google's Chrome Web Store

The **Chrome Web Store** is Google's online **store** for **web** applications for Google**Chrome** or Google Apps. The software allows users to install and run **web** applications for the Google **Chrome** browser. You can find apps, extensions, and browser themes for the [Google Chrome browser](#) in the [Chrome Web Store](#).

Click on <https://chrome.google.com/webstore/category/apps> and a pages of apps will come up. Download the [Chrome App Launcher](#) and a white square with square dots will appear on you taskbar. Icons of your apps will be saved there. One of the apps is the Web Store.

Within it are some of the apps I was curious about. To find others go to the Web Store. You will have the choice of looking at apps, extensions, or themes.

There are thousands of apps, many extensions and themes (photos).

There are lots of amateur programmers dreaming up stuff that works. If you like spending some time poking around looking for something interesting or useful you could use up a lot of it (time) doing just that.
