

# *The Modern Home*

*The best technology is not seen*

# *What is Invisible Technology*

*Less visible to the human eye.*

*Simple for Users to use*

*Camouflaging everything from when the action takes place until the reaction comes.*

# ***What is the Modern Home***

## ***Access to Information***

***Who - What - Where - When***

## ***Control of Home Appliances***

***Lights - HVAC - Wall Receptacles - Switches - Computers - TV***

## ***Products & Services***

***Food - Car Services - Products - Music***

# *Information*

*Google Now (On Tap)*

*Siri*

*Contana*

*Alexa*

# *Control of Home Appliance*

**Wifi Hubs** - multiple devices are connected to a Hub/Gateway and controlled by a single application on a smartphone or computer

**Standalone Smart devices** - controlled by a separate application for each device on a smartphone or computer

**Google** - Android Home

**Apple** - Siri Homekit

**Amazon** - Echo

# *Services & Products*

To list a few

*Amazon*

*Uber*

*Ebay*

*Google*

*Apple*

# ***Modern Home - State of the Art***

*Until February 2015 the Modern Home was fractured with competing services. These Services are confusing and can be difficult to use requiring multiple applications.*

*The goal is to have an AI (Artificial Intelligence) to take care of all our needs. What we do have is an Intelligent Assistant.*

**Introducing the Echo & Alexa**

# How the Echo Works - Several Quick Videos
