

Evernote

Evernote is especially designed for business: meetings, chats, -- but we can use it too.

What we usually enter in our computers daily:

- calendar
- notes
- todo lists

Reviews

- First appeared 2008.
- Rated excellent by PC Magazine
- Sync with cell phone.
- Notes available from anywhere using devices with Evernote on it.

What Evernote can do:

- Sort notes, screen captures, etc. by notebooks
- Saves to the cloud.
- Storage limit 60MB/month, no total limit.
- Collect data for areas of interest.
- (Does NOT have a calendar)
- Has a community forum.
- Tables (columns and rows -- movable)
- Email a notebook.
- Chat with another.
- Share a notebook.

Presentation:

- Make some notebooks
- Add a note
- Search a notebook.
- List all notes.
- Clip and store online articles.
