SETTING UP WINDOWS 10

GENERAL – PRIVACY OPTIONS

General

Change privacy options

Let apps use advertising ID to make ads more interesting to you based on your app usage (turning this off will reset your ID)

Off

Let websites provide locally relevant content by accessing my language list

Off

Let Windows track app launches to improve Start and search results

Off

Show me suggested content in the Settings app

Off

SPEECH – PRIVACY OPTIONS

The screenshot displays the Windows Settings application. The left sidebar shows the 'Settings' menu with 'Speech, inking, & typing' selected. The main content area is titled 'Speech, inking, & typing' and contains the following text:

Speech, inking, & typing

Getting to know you

Use your voice to do things like talk to Cortana or Store applications, and use your typing history and handwriting patterns to create a local user dictionary that makes better suggestions for you. Microsoft will use your voice input to make cloud-based speech services work even better.

When this is switched off, you can't speak to Cortana, and your typing and inking user dictionary will be cleared. Speech services that don't rely on the cloud, like Windows Speech Recognition, will still work. Typing suggestion and handwriting recognition using system dictionary will also continue to work.

Turn on speech services and typing suggestions

[View user dictionary](#)

The taskbar at the bottom shows the Start button, search bar, microphone icon, task view icon, and several application icons including Edge, File Explorer, Mail, Photos, Word, and PowerPoint. The system tray on the right shows the address bar.

DIAGNOSTIC – PRIVACY OPTIONS

The screenshot displays the Windows Settings application. The left sidebar is open to 'Diagnostics & feedback'. The main content area is titled 'Diagnostics & feedback' and contains the following sections:

- Diagnostics & feedback**
 - D diagnostic data**

Choose how much data you send to Microsoft. Select [Learn more](#) for info on this setting, how Windows Defender SmartScreen works, and the related data transfers and uses.

 - Basic:** Send only info about your device, its settings and capabilities, and whether it is performing properly. Diagnostic data is used to help keep Windows secure and up to date, troubleshoot problems, and make product improvements. Regardless of whether you select Basic or Full, your device will be equally secure and will operate normally.
 - Full:** Send all Basic diagnostic data, along with info about the websites you browse and how you use apps and features, plus additional info about device health, device usage, and enhanced error reporting. Diagnostic data is used to help keep Windows secure and up to date, troubleshoot problems, and make product improvements. Regardless of whether you select Basic or Full, your device will be equally secure and will operate normally.
 - Improve inking & typing recognition**

Send inking and typing data to Microsoft to improve the language recognition and suggestion capabilities of apps and services running on Windows.

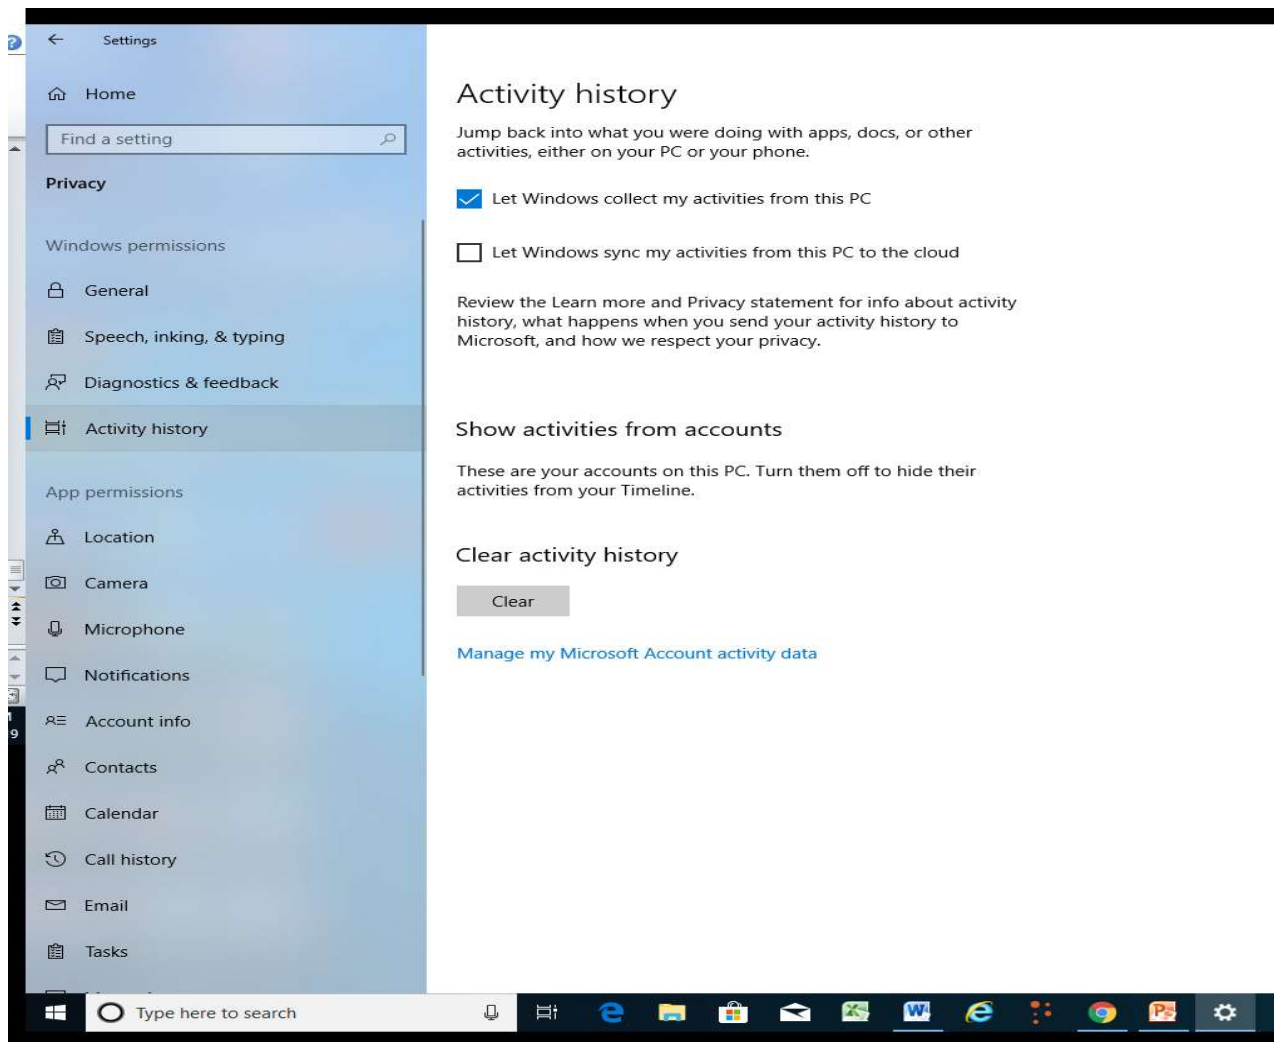

Off
 - Tailored experiences**

Let Microsoft offer you tailored experiences based on the diagnostic data setting you have chosen. Tailored experiences are personalized tips, ads, and recommendations that enhance Microsoft products and services for your needs.

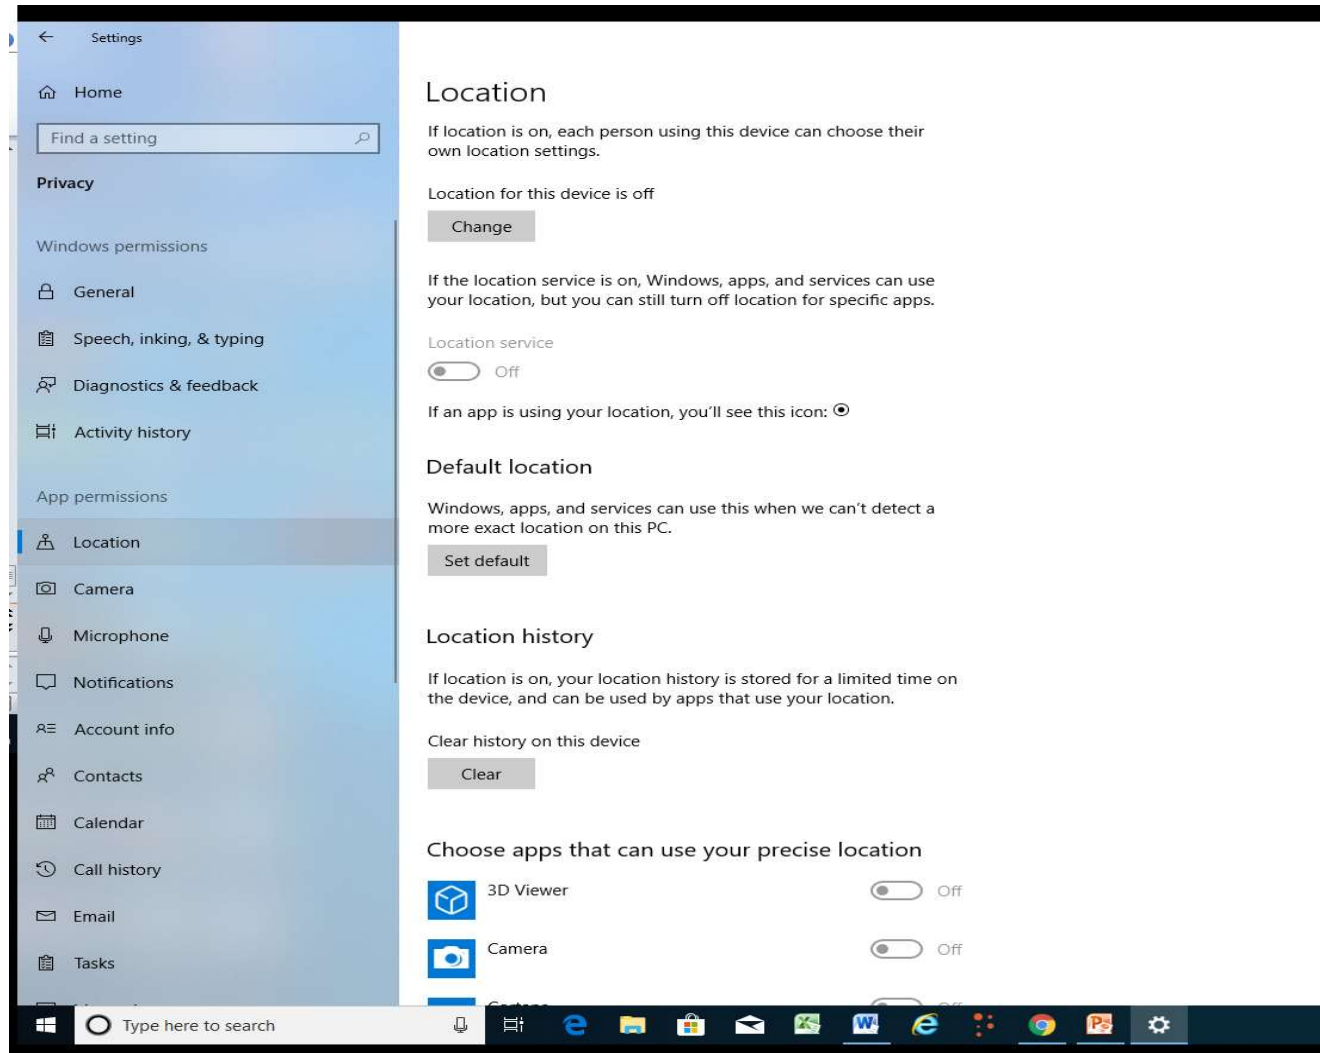

Off
 - D diagnostic data viewer**

The taskbar at the bottom shows the search bar with the text 'Type here to search' and several application icons including Edge, File Explorer, Mail, Photos, Word, and Settings.

ACTIVITY – PRIVACY OPTIONS

LOCATION – PRIVACY OPTIONS

CAMERA – PRIVACY OPTIONS

The screenshot displays the Windows Settings application, specifically the 'Camera' privacy settings page. The left sidebar shows the 'Settings' menu with 'Camera' selected under 'App permissions'. The main content area is titled 'Camera' and contains the following sections:

- Allow access to the camera on this device**: A section explaining that allowing access lets users choose if apps can use the camera. A 'Change' button is present, and the status is 'Camera access for this device is on'.
- Allow apps to access your camera**: A section explaining that allowing access lets users choose which apps can use the camera. A toggle switch is currently set to 'Off'.
- Choose which apps can access your camera**: A list of applications with toggle switches to control their camera access:
 - 3D Viewer: Off
 - Camera: Off
 - CameraBarcodeScannerPreview: Off
 - Cortana: Off
 - Feedback Hub: Off

The Windows taskbar is visible at the bottom, showing the search bar and various application icons.

MICROPHONE – PRIVACY OPTION

The screenshot shows the Windows Settings application with the 'Microphone' privacy page open. The left sidebar lists various settings categories, with 'Microphone' selected. The main content area is titled 'Microphone' and contains three sections: 'Allow access to the microphone on this device', 'Allow apps to access your microphone', and 'Choose which apps can access your microphone'. The first section has a 'Change' button. The second section has a toggle switch set to 'Off'. The third section lists several apps with their microphone access toggles set to 'Off': 3D Viewer, Camera, Cortana, Feedback Hub, HP Smart, Keeper, and Messaging.

Microphone

Allow access to the microphone on this device

If you allow access, people using this device will be able to choose if their apps have microphone access by using the settings on this page. Denying access blocks apps from accessing the microphone.

Microphone access for this device is on

[Change](#)

Allow apps to access your microphone

If you allow access, you can choose which apps can access your microphone by using the settings on this page. Denying access only blocks apps from accessing your microphone. It does not block Windows.

Off

Choose which apps can access your microphone

Some apps need to access your microphone to work as intended. Turning off an app here might limit what it can do.

	3D Viewer	<input type="checkbox"/> Off
